PROFESSIONAL SUMMARY

Mobile Engineering Lead and Technical Project Manager with 4+ years of native iOS development experience and 2+ years leading end-to-end delivery of multiple concurrent mobile projects for international and GCC-facing clients, including a live Saudi Arabia market platform. Proven ability to balance hands-on iOS architecture (Swift, SwiftUI, MVVM, Clean Architecture) with full Agile/Scrum delivery ownership — sprint planning, cross-functional orchestration across iOS, Android, Backend, UI/UX, and QA, stakeholder reporting, and technical risk mitigation. Recognized for translating business requirements into scalable technical roadmaps while maintaining hands-on code quality, App Store governance, and on-time, on-budget delivery across simultaneous client engagements. Immediately available to relocate/join in the UAE.

CORE COMPETENCIES & KEYWORDS

Project & Delivery Management: Agile/Scrum Leadership, Sprint Planning & Retrospectives, End-to-End SDLC Ownership, Multi-Project Concurrent Delivery, Jira, Confluence, Stakeholder Management & Reporting, Scope & Timeline Management, Resource Allocation, Technical Risk Mitigation, Cross-Functional Team Orchestration, Client Communication

Mobile Architecture & iOS Engineering: Swift, SwiftUI, UIKit, Objective-C (working knowledge), MVVM, MVVM-C, MVC, Clean Architecture, RESTful APIs, GraphQL, WebSockets, Core Data, Firebase (Realtime DB, Auth, Push Notifications), Combine, RxSwift, ARKit, MapKit, AVFoundation, Memory Optimization (Instruments), Secure Coding & Data Protection

DevOps & Quality Assurance: CI/CD Pipelines, Git Workflows (Git Flow), App Store Connect, TestFlight, CocoaPods, Swift Package Manager, XCTest (Unit & UI Testing), Postman, Crash & Performance Monitoring, Code Review Governance

PROFESSIONAL EXPERIENCE

Homey Infosystem Pvt Ltd | Remote (Saudi Arabia)

June 2025 – Present

Lead iOS Developer / Technical Delivery Lead

- Delivered end-to-end technical leadership across 3+ concurrent mobile initiatives, achieving 95%+ on-time sprint delivery by orchestrating cross-functional collaboration across iOS, Android, Web, UI/UX, and QA teams.
- Reduced production defect rate by an estimated 25% by architecting and governing scalable iOS applications in Swift and SwiftUI under MVVM Clean Architecture standards, enforced through structured code review.
- Improved sprint predictability and stakeholder confidence by owning full Agile/Scrum ceremonies — sprint planning, daily standups, and sprint reviews — for a multi-platform product team, reporting delivery status directly to business stakeholders.
- Increased app reliability and real-time responsiveness by integrating RESTful APIs and live data features (real-time booking availability) into a Booking.com-style accommodation platform serving the Saudi Arabia market.
- Mitigated performance-related technical risk by profiling and optimizing app performance through efficient state management and memory handling using Instruments, ahead of client release milestones.

Axel Technologies Pvt Ltd | India

December 2022 – May 2025

iOS Developer

- Achieved a 30% reduction in page load times by re-engineering API call handling using modern Swift concurrency (async/await), directly improving user retention metrics for a 6-person cross-functional delivery team.

- Strengthened data reliability and offline resilience across client applications by implementing robust persistence solutions using Core Data and Firebase Realtime Database.
- Enabled real-time feature delivery (live updates and push notifications) for multiple client products by integrating third-party APIs and backend services under tight sprint timelines.
- Improved app stability and crash-free session rates by leveraging advanced iOS frameworks and systematic code profiling as part of every release cycle.
- Contributed to consistent on-schedule delivery by actively participating in Agile Scrum ceremonies, including daily standups, sprint reviews, and release planning, across the full SDLC.

Codilar Technologies | India

August 2022 – December 2022

Associate Software Engineer (Intern)

- Built and shipped dynamic web applications using PHP (Magento Framework), HTML, CSS, and JavaScript, strengthening cross-stack understanding of client-server architecture now applied to mobile-backend integration.
- Implemented database-driven features using MySQL while maintaining clean version control discipline (Git), foundational to current CI/CD and Git workflow governance.
- Collaborated within a cross-functional team to deliver tested, production-ready web solutions on schedule.

Self-Employed | Remote / International Clients

April 2019 – May 2021

Freelance iOS Developer

- Independently managed the full SDLC — design, development, testing, and release — for multiple client iOS applications, successfully publishing each to the App Store.
- Built and maintained Swift/SwiftUI applications for diverse clients, conducting thorough QA testing and debugging to ensure production stability.
- Successfully navigated the App Store review process end-to-end, resolving Apple reviewer feedback to secure timely approvals — early experience in stakeholder communication and release governance.

KEY PROJECTS & DELIVERY PORTFOLIO

Homey — Accommodation Booking Platform (Saudi Market): Led technical delivery of a full-featured, Booking.com-style platform for the Saudi Arabia market, encompassing hotel/apartment search, real-time availability, booking management, secure payment integration, and GPS-based filtering.

DoctorAssist — Healthcare Management App with Generative AI: Coordinated multi-platform delivery (iOS, Android, Web) of an end-to-end clinic management platform featuring appointment scheduling, patient records, WhatsApp template integration, and Generative AI-powered medical note generation.

Workpex — CRM & Lead Management App: Delivered a sales pipeline and lead management platform with follow-up automation, call tracking, GPS functionality, and analytics integrations, managed as a concurrent workstream alongside other active client projects.

DozPass — Travel Privileges App: Delivered a travel companion application offering priority access to lounges, hotels, restaurants, and EV stations for a premium international user base.

Dually — Social Media Platform (Dual Camera Live): Delivered an Instagram-style platform with an advanced dual-camera live streaming capability, broadcasting simultaneously from front and back cameras.
