MOBILE APPLICATION DEVELOPER

Dedicated and forward-thinking **iOS Developer** with **4 years** of experience specializing in crafting high-quality, modern, and user-centric applications using **Swift** and the latest declarative frameworks, primarily **SwiftUI**. Proficient in the complete iOS development lifecycle, from conceptualization and architecture (MVVM, MVC) to testing (Unit/UI Testing) and deployment. Deep expertise in leveraging Apple's core frameworks (e.g., UIKit, MapKit, Core Data) to deliver seamless and performant user experiences. Proven ability in **robust backend integration** (RESTful APIs, GraphQL) and implementing modern data flow architectures (Combine, RxSwift). **Passionate about exploring and integrating Generative AI** capabilities into mobile solutions to create innovative, state-of-the-art interactive application experiences.

STRENGTH AND EXPERTISE

- **Programming Languages:** Swift, Swift UI, HTML, CSS
 - **Frameworks and Libraries:** UI Kit, Swift UI, Core Data, Core Animation, ARKit, Combine, Rx Swift, Map Kit, AV Foundation, Notification Center
 - **Tools and Technologies:** Xcode, Cocoa Pods, Cocoa Touch, Swift Package manager, Git, Firebase, Push Notification, Jira, Memory Management, UI/UX
 - **APIs:** RESTful APIs, Graph QL, Web Sockets
 - **Design Patterns:** MVC, MVVM
 - **Testing:** Unit testing, UI testing, XC Test
 - **Database:** Core Data, SQL, Firebase Realtime Database
-

PROFESSIONAL EXPERIENCE

Homey Infosystem Pvt Ltd

June 2025 – Present

iOS Developer

As a full-time iOS Developer at Homey Infosystem, I contribute to building scalable, high-performance mobile applications aligned with modern industry standards. I collaborate closely with cross-functional teams to deliver intuitive and user-focused digital solutions.

Accomplishments:

- Successfully managing and coordinating team members across different domains including Android developers and web developers to ensure smooth collaboration and timely project delivery.
- Developing and maintaining advanced iOS applications using Swift and SwiftUI, following clean architecture principles (MVVM).
- Integrating RESTful APIs and real-time data features to enhance app functionality and reliability.
- Working closely with UI/UX teams to refine user flows and elevate mobile experience quality.
- Improving app performance through optimization, efficient state management, and proper memory handling.
- Participating in Agile development processes including sprint planning, reviews, and daily standups.

iOS Developer

As a full-time Mobile Application Developer, I am responsible for converting ideas to products using modern technology and collaborating with the dynamic team.

Accomplishments:

- Worked in a 6-person development team, experiencing guidance, mentorship, and hands-on technical expertise, skill development, and ensure timely delivery of high-quality solutions.
- Utilized various App optimization techniques in Swift to enhance application performance. Successfully optimized API calls, resulting in a 30% reduction in page load times
- Implemented robust data management solutions using Core Data and other data storage technologies.
- Integrated with various APIs and backend services to power dynamic app features.
- Optimized app performance and user experience by leveraging advanced iOS frameworks and techniques.
- Experience with Agile Scrum Methodology, highly involved in daily scrum meeting, sprint review meeting and scrum Release Planning

Codilar Technologies**August 2022 - December 2022****Associate Software Engineer**

As an associate Software Engineer Intern at Codilar Technologies, I develop and maintain innovative web app & website leveraging the latest technologies. I work closely with our team to deliver high-quality, scalable applications.

Accomplishments:

- Developed dynamic web applications using PHP frameworks like Magento Framework
- Created responsive and user-friendly web interfaces using HTML, CSS, and JavaScript.
- Designed and developed responsive websites and web applications.
- Conducted thorough testing to identify and fix bugs, ensuring the quality of the application.
- Implemented database-driven applications using MySQL and other relational databases.
- Utilized version control systems (Git) to manage code effectively.
- Collaborated with cross-functional teams to deliver high-quality web solutions.
- Stayed up-to-date with the latest web development trends and technologies.

Self Employed**Freelance iOS Developer****April 2019 - May 2021**

- Independently developed and deployed iOS applications to the App Store, managing the entire development and release process.
 - Developed iOS applications for various clients, leveraging Swift and SwiftUI to create user-friendly and high-performance apps.
 - Conducted thorough testing and debugging to ensure app quality and stability before release.
 - Successfully navigated the App Store review process, addressing any feedback or issues raised by Apple reviewers.
-

PROFESSIONAL EDUCATION

B. Tech in computer science Engineering

August 2018 - August 2022

M Dasan Institute of Technology Kozhikode, Kerala

PROJECTS

workpex

Application that offers streamlined lead management with clear sales pipelines, timely reminders for follow-ups, alerts for overdue leads, call tracking and recording, GPS functionality, analysis, multiple integrations and it helps businesses to manage their interactions with customers

dozpass

Worked on Application for travellers, offering priority access to Lounges, Hotels, Restaurants & EV stations. Which committed to provide a high-end service to travellers for a stress free, comfortable and safe stop-over time that will leave them recharged to continue their journey.

Homey

A full-fledged accommodation booking platform designed for the Saudi market, functioning similarly to Booking.com. Features include hotel and apartment search, real-time availability, booking management, user authentication, wishlists, secure payment integration, and location-based filtering. Focused on delivering a smooth and intuitive booking experience for travelers across Saudi Arabia.

DoctorAssist App

A complete healthcare management application enabling doctors and clinics to manage appointments, patients, visit history, reminders, notifications, and WhatsApp communication templates. Includes advanced admin dashboards, automated scheduling, dynamic notifications, and seamless multi-platform coordination with Android and Web teams and integrated Generative AI features for automated medical note generation, smart suggestions, and improved workflow efficiency.

DECLARATION

I hereby declare that all the information mentioned above is true to the best of my knowledge, and references will be available upon request.
